## HELICOPTERS AND OPERATORS IN NORTH AMERICA AS LISTED IN THE 1985/86 AIA DIRECTORY<sup>1</sup>

A total of 7904 helicopters are listed in this Directory as reported by 2481 operators. These totals are down from the 1982 count due to a number of factors. Among these factors, a contraction in the off-shore oil exploration industry and transfers of ownership involving new owners who are not yet listed in the Directory.

In addition, a theme reflected throughout the industry and in this Directory is the upgrading of helicopter fleets from earlier models to today's modern helicopters which out perform their predecessors in range, speed and capacity. This trend is especially evident among law enforcement agencies with current acquisitions replacing the surplus military helicopters. The net result is an overall increase in performance and capacity with a reduction in units. Fewer helicopters can perform more work.

There is also a substantial number of operators who have recently purchased used equipment through the manufacturers. Many of these are new operators who will become a potential market for equipment up-grades in the future.

The number of emergency medical helicopter services continues to increase. Today there are 112 hospital sponsored ambulance services, with an additional 36 operated by state, municipal and commercial operators.

The number of helicopter flight schools increased to 241.
