**DIRECTORY
OF
HELIPORTS/HELISTOPS
IN THE
UNITED STATES, CANADA AND PUERTO RICO**

The 1968 Directory of Heliports/Helistops compiled by the Vertical Lift Aircraft Council of the Aerospace Industries Association reveals that the number of heliports/helistops has increased fivefold since 1960.

Based on information provided by the Federal Aviation Administration, the State Directors of Aeronautics, the Canadian Department of Energy, Mines & Resources, helicopter operators and manufacturers, 1892 heliports/helistops are listed in the 1968 Directory of which 158 are proposed facilities.

Of these 1892 heliports, 1734 are ground level and the remaining 158 are elevated.

In addition, the petroleum industry, a major user of helicopters, provides helistops -- landing platforms for helicopters -- on the more than 100 off-shore oil rigs in the Gulf of Mexico.

The U. S. Forest Service, another major user of helicopters, maintains approximately 300 heliports and more than 5,000 unimproved helistops around the country.

In the following tabulation of heliports by state, California continues to lead with 344 established heliports and 10 proposed.

					1,892	1,225	357

In 1965, based on a Vertical Lift Aircraft Council survey, there were 34 hospital heliports in the country. There are 186 landing facilities for this modern aerial ambulance -- the medicopter -- to transport highway accident victims to the hospital, emergency cases from community hospitals to medical centers for specialized treatment and doctors and nurses to hospitals during heavy snows or when disaster strikes. (See center spread for illustrations and list of U. S. Hospital Heliports.)

Today increasing emphasis is being placed on city-center and suburban heliports for public use. Airport congestion and the snarls of intra-metropolitan traffic have generated a new interest in fuller utilization of vertical lift vehicles as a complement to existing modes.
