Aircraft Industry Speaks!

Airline

WASHINGTON—(AP)—At a press conference in this city yesterday, the Association of American Airlines issued the following statement:

"The airline industry is in the process of building a fleet of new aircraft which will enable it to meet the growing demand for air transportation. This is a major undertaking which involves the expenditure of hundreds of millions of dollars. The industry is confident that it will be able to meet this challenge, and that it will continue to provide safe, efficient, and economical air transportation for the public."

Long-Range Plan Balsters "All Out" Defense Program

Plane Makers Moved to Use Idle Ages

Redondo Beach, Feb. 1.—(AP)—The United States government has ordered the relocation of all the idle plane factories in the United States to the West Coast. The decision was made in response to the increasing demand for aircraft production. The new factories will be located in the area surrounding Los Angeles, which has been designated as the new center of aircraft production. The relocation of the factories is expected to help meet the demand for aircraft and to stimulate economic growth in the region.

Know America's Planes

By John F. Tietjen

The American aircraft industry’s ability to produce more types of aircraft needed for defense is illustrated by the remarkable progress that has been made during the past few years. The industry is now producing a wide range of aircraft, from small trainers to large bombers, and is capable of meeting the demands of the armed forces. The industry is also making progress in the development of new types of aircraft, such as the jet engine. The American aircraft industry is a large and diversified industry, producing a wide range of products, from small aircraft to large commercial planes. The industry is well equipped to meet the demands of the armed forces and to contribute to the nation’s defense. The future of the American aircraft industry is bright, and it is expected to continue to grow and to become even more important in the national economy.
