Increasing purchasing power and prosperity in communities from sea to sea, airplanes, engines and propeller factories have been built in the United States of America during the months of July.

Here is the story of one month’s progress in the airplane industry, told in statistics:

American Planes
Soon Will Patrol
Entire Atlantic

London Describes Features
of Catalina Along
Convoy Route

Faithful workhorses of the air transport and F.K.W. (Freight, Mail and \& Wares) services which are providing a valuable service to the nation during the continuous make-up of the S. E. Zone and Reversal in European operations. These U. S. Navy ships are possessed of the world’s largest covered, hospital, and other use.

London, Sept. 8th: The H. M. A. (Home Mo. A.) has reported an increase in the number of American airplanes which are coming to this country on a trial basis, and it is understood that the number of these airplanes will be increased in the near future.

By the end of the month, the total number of American airplanes which are coming to this country will be increased to about 5000, it is understood.

The new planes are expected to be received at the main airports of this country, and the British Ministry of Air will make arrangements for the proper handling of these airplanes. It is understood that the British Ministry of Air will make arrangements for the proper handling of these airplanes.

Warplane Engine
Across the Sea

Rolls-Royce Power Plant
New V-12

New York, Sept. 15th—The Rolls-Royce engine, the V-12, has been adopted by the British Air Ministry as the power plant for the S. E. Zone, and Reversal in European operations. The British Ministry of Air has ordered 5000 of these engines, it is understood, for use in the British Air Force, and it is expected that the engines will be received at the main airports of this country, and the British Ministry of Air will make arrangements for the proper handling of these airplanes.

By the end of the month, the total number of American airplanes which are coming to this country will be increased to about 5000, it is understood.

AIRCRAFT INDUSTRY’S TASK DOUBLED,
PLANE ORDERS TOP $5 BILLION MARK!

22,000 New Jobs
Created in July;
Payrolls Mount
Big Man-Hours Increase
Shows Rising Tide

P. M. RELEASE, SEPTEMBER 15
WASHINGTON, Sept. 15—The American Aircraft Industry has reported the following figures for the month of July: The number of airplanes ordered increased by 22,000, the total number of employees increased by 22,000, and the number of man-hours increased by 22,000.

The industry is estimated to be operating at about 85% of its capacity, and new orders have been placed with most of the major airlines.

This is a very significant development, and the industry is expected to continue to grow at this pace.

The increase in the number of employees is due to the increase in the number of airplanes ordered, and the increase in the number of man-hours is due to the increase in the number of employees.

The industry is estimated to be operating at about 85% of its capacity, and new orders have been placed with most of the major airlines.

This is a very significant development, and the industry is expected to continue to grow at this pace.

The increase in the number of employees is due to the increase in the number of airplanes ordered, and the increase in the number of man-hours is due to the increase in the number of employees.
