ECONOMIC BENEFITS OF BIG PLANE PROGRAM SEEN IN THREE STATES

Los Angeles, Calif. (AP)—Employment gains and production benefits associated with the big plane program now under way in California, Arizona and Nevada, were described by James H. McVey, president of the Aeronautical Chamber of Commerce of America.

"The airplane industry of the three southwestern states is now engaged in the production of military and transport aircraft, and this activity is having a significant impact on the economies of these areas," McVey said.

The three states are involved in the production of transport and military aircraft, which are essential to the nation's defense. In California, the aircraft industry is centered in Los Angeles and San Diego. Arizona is home to companies such as Boeing and Lockheed, while Nevada is home to Northrop Grumman and Sierra Nevada Corporation.

McVey noted that the aircraft industry in the three states provides employment opportunities for a large number of workers. In addition, the industry also brings in revenue to the states through taxes and other economic benefits.

The aircraft industry in California is one of the largest in the nation, with companies such as Boeing, Lockheed, and Northrop Grumman employing thousands of workers. In Arizona, companies such as Boeing and Lockheed are major employers, while in Nevada, Northrop Grumman and Sierra Nevada Corporation are among the largest employers.

McVey said that the aircraft industry is also a significant contributor to the states' economies, bringing in revenue through taxes and other economic benefits.

"The aircraft industry is a major driver of the economies of these three states," McVey said. "It provides employment opportunities for a large number of workers, and it is a significant contributor to the states' economies through taxes and other economic benefits.

McVey also noted that the aircraft industry is an important part of the nation's defense, providing critical capabilities to the military.

"The aircraft industry is a critical part of the nation's defense," McVey said. "It provides critical capabilities to the military, and it is essential to the nation's security.

The aircraft industry in the three states is expected to continue to grow in the coming years, providing new opportunities for workers and economic benefits to the states.

"The aircraft industry is expected to continue to grow in the coming years," McVey said. "It will provide new opportunities for workers and economic benefits to the states.
