

Aerospace Industries Association (AIA) National Aerospace Standards (NAS) AI Policy

July 2025

1. Use of National Aerospace Standards in AI Models

1.1. Users of the National Aerospace Standards (NAS) are strictly prohibited from incorporating NAS into any large language model (LLM) or other artificial intelligence (AI) systems without the express written permission of an officer of the Aerospace Industries Association (AIA).

1.2. Any request for permission to use NAS in AI models must be submitted in writing to AIA and will be evaluated on a case-by-case basis. Unauthorized use of NAS in AI models will be considered a violation of AIA's intellectual property rights and may result in legal action.

2. Use of AI in the Development of National Aerospace Standards

2.1. AI tools may be utilized in the development of National Aerospace Standards to assist with tasks such as data analysis, drafting, and research. However, AI-generated content must not be the sole source of any standard.

2.2. A human subject matter expert (SME) must be involved in the development process and is responsible for reviewing, validating, and approving any AI-generated content before it is submitted to the AIA for inclusion in a National Aerospace Standard.

2.3. The SME must ensure that all AI-generated content adheres to the highest standards of accuracy, relevance, and quality. The SME's expertise and judgment are critical to maintaining the integrity and reliability of the NAS.

2.4. Any content submitted to the AIA for inclusion in a National Aerospace Standard must be original and not previously copyrighted. The SME is responsible for verifying the originality of the content and ensuring compliance with copyright laws.

2.5. AI engines used in the development of NAS must have terms of use that preclude the integration of prompt data into publicly available content.

3. Policy Review and Updates

3.1. This policy will be reviewed periodically and updated as necessary to reflect advancements in AI technology and changes in legal and regulatory requirements.

3.2. Any updates to this policy will be communicated to all relevant stakeholders in a timely manner.
